

Integrated Management System Policy

Cressall Resistors Ltd is a global presence in the design, manufacture and repair of specialised high-power resistors and heaters for the industrial, load bank, power generation, power distribution, traction, marine, defence and automotive markets.

We are fully committed to ensuring the high standards of Health & Safety, Quality and Environmental performance through compliance with ISO 9001 and ISO 45001 and to the requirements of ISO 14001.

We will consistently develop and provide products and services that meet or exceed our customer's expectations on quality and delivery and to fulfil all their requirements, including legal requirements and compliance obligations.

Through this policy, management review and the continual improvement of our management systems we aim to:

- Provide a framework to set QESH objectives and targets
- Provide Safe and Healthy working conditions for the prevention of injury and ill health.
- Eliminate hazards and reduce risks
- Consider Climate change actions to protect the environment by monitoring and reducing our energy and natural resource usage
- Manage our environmental risks to prevent pollution and minimise the generation of waste by recycling and considering the Life Cycle of products at design.
- To communicate these climate change considerations and provide a platform which enables worker consultation and participation on matters that affect their Health and Safety.
- Provide assurance of conformity to all customers to become the "Supplier of Choice" in our selected markets.
